

WEDE5020 Part One Improvements

Student name: Arielle M. Kalenda

Student number: ST10531911

Subject name: Web Development

Purpose.....	1
Summary of Part 1 Feedback	2
Detailed Improvement Plan	2

Purpose

This document outlines the specific improvements I will make to my **Website Project Proposal (Part 1)** based on the feedback and marks received. These changes will be implemented **before or during Part 2** (CSS styling and responsive design). All corrections will also be recorded in the README.md changelog as required.

Summary of Part 1 Feedback

Criterion	Marks Lost	Issue Identified
Design Aesthetic	2 / 2	Missing or unclear.
Wireframes	1 / 2	Incomplete or lacking detail.
Technical Requirements	1 / 2	Vague or incomplete.
Timeline	1 / 2	Vague or unrealistic.
Budget	1 / 3	Clear but lacks detail.
Goals & Objectives	1 / 3	Clear but lacks detail.
Current Website Analysis	1 / 3	Adequate but lacks depth.
Proposed Features	1 / 3	Clear but lacks detail.
Content Research	2 / 10	Not fully comprehensive.
Sitemap	1 / 5	Complete but could be more detailed.
GitHub commits	1 / 5	Commits lack detail or not enough.
README / Changelog	1 / 5	Incomplete or lacks detail.
References	1 / 5	Could be improved.

Detailed Improvement Plan

Based on my Part 1 feedback, I will make the following improvements for Part 2:

1. Design Aesthetic

Add colour palette (#FDF5E6 cream, #D8A7A7 dusty pink, #A3B5A6 sage green, #2C2C2C charcoal) and typography (Georgia for headings, Arial for body) to the proposal.

2. Wireframes

Draw hand-drawn wireframes for Home, Products, and Contact pages and insert image into proposal.

3. Technical Requirements

Specify HTML5, CSS3, Vanilla JavaScript, GitHub Pages hosting, and srcset for responsive images.

4. Timeline

Replace with weekly schedule realistic for a first-year student (Week 1 proposals, Week 2

wireframes/HTML, Week 3 CSS desktop, Week 4 responsive, Week 5 JavaScript, Week 6 testing, Week 7-8 final).

5. Budget

Add line items: domain [.co.za](https://www.co.za) R99, free hosting (GitHub Pages), total R99.

6. Goals & Objectives

Add KPIs: 500 unique visitors (simulated), 30 simulated orders, average time on site 2+ minutes.

7. Current Website Analysis

Add competitor comparison and quantify user pain points (e.g., Instagram only → 5–10 enquiries/week; website could increase to 50+).

8. Proposed Features

Add priority table: High (product catalogue, cart, responsive design), Medium (enquiry form, two locations).

9. GitHub Commits

Make at least 10 descriptive commits during Part 2 (e.g., "Added CSS reset", "Created product grid").

10. README & Changelog

Add changelog entries for all fixes above and include screenshot evidence of desktop/tablet/mobile testing.

11. References

Add W3Schools, MDN Web Docs, and Pexels in Harvard style.

These improvements will be implemented during Part 2 and recorded in my README.md changelog.
